Metal treatment

and Drop Forging *(Established 1935)*

Index to volume 27

January to December 1960

ARTICLES

A

Air-hardening steel raw 340
Aluminium alloys, press forming 161
Aluminium production at Rogerstone 470
Aluminium, stress-relieving 101
Annealing and hot working high-nickel alloys .. 367
Austenitic transformation influenced by small stresses, use of 166
Automatic control at Ford's 208
Automatic copper rod rolling 251
Automatic forging, all 218
Automatic heat treatment, fully 338

B

Basic research into metal fatigue 50
Bell furnaces 209
Boron and silicon 424

C

Carbide stringers on the distortion of die steels during heat treatment, effect of 395, 455, 487
C-Au-C and C-Pt Pd-C extraction replicas for electron microscope analysis 445
Cavities by spark-erosion, practical and economic problems of machining 493
Cavity sinking, practical aspects of 151
Cermets, the 60
Coil spring research 168
Coin manufacture 176
Cold deformation of metals 189, 231
Cold extrusion, precision 303
Cold forging process, basic feature of the 480
Colour television 289
Computer-controlled gas-cutting machine 518
Copper rod rolling, automatic 251
Copper-titanium alloys, high-strength 62
Counterblow hammer 172
Creep in steel 461

D

Determination of oxygen in steel 28
Dies for hot forging, giant 88
Distortion of die steels during heat treatment, effects of carbide stringers .. 395, 455, 487
Drop stamp and forging presses, technical developments in 415, 439

E

Electrode beam welding 433
Electrode materials 103
Electron-microscope analysis, C-Au-C and C-Pt Pd-C extraction replicas 445
Electron-microscope symposium 75
Electron microscope, the, some applications to the study of aluminium 409
Electron microscopy, application of 19, 91, 133, 177, 225, 277, 319, 445
Electrothermal stress relieving 335
Emission microscope, adsorption of tungsten crystal made visible 373
Extraction replicas for electron micrope analysis, C-Au-C and C-Pt Pd-C 445

F

Factors influencing working characteristics .. 139
Fatigue, basic research into 50
Fatigue breakdown in carbon steels 503
Fatigue fracture 250
Fibre metals 291
Firth-Brown forge development scheme 86
Forge furnace, experimental 306
Forging trainees 423
Fracture test for alloy steels 374

G

Gas-fired heat-treatment furnace 357

H

Hammer foundations, theory and practice 283
Hardened and tempered mild steel structures .. 177
Heat treating brass and copper tube 224
Heat treating gun barrel forgings 73
Heat treating, temperature uniformity in 63
Heat treating titanium 301
Heat treatment at Babcock & Wilcox Ltd. 113
Heat treatment, fully automatic 338
Heat treatment furnace, gas fired 357
Heat treatment line, one-man 71
Heat treatment of aluminium wire 35
High-nickel alloys, annealing and hot working .. 367
High-strength stainless steels 2
History of die forming, the 401
Hot forging, giant dies for 88
Hot working of plain carbon steels 139

I

Induction hardening 316
Integral bulb-shaped forgings 302

M

Magnetic quenching 362
Metallurgy in nuclear power technology 265, 307, 449, 511
Mn-V steel for large forgings 53

N

Nickel-based, vacuum-melted, experimental high-temperature alloy 15
Nimocast 258, some effects of grain-size on the mechanical properties 219
Niobium for high temperatures, coating 230
Nuclear power technology, metallurgy in 265, 307, 449, 511

O

Oxygen in steel, determination of 28

P

Phase analysis of austenitic-ferritic welded joints .. 225
Physical metallurgy, development in research techniques 67
Precision cold extrusion 303
Precision forging 363
Prespheroidizing, modification of the cast structure of high-speed steel 317
Press forming aluminium alloys 161
Press quenching, automatic control at Ford's .. 208

Q

Quenching aluminium sheet 296

R

Radiograph, large-scale 288
Rapid oxidation of titanium 282
Rhenium 294
Russian forging journal .. 44, 264, 422, 468, 502
Russian welding specialists visit Britain 474

S

Scale removal prior to reheating for quenching, effect of 145
Silicon, boron and 424
Solidification of alloys, the 327, 351
Spark erosion for industry 197
Spark erosion, practical and economic problems of machining cavities 493
Spark machining and its development 3
Spring steel, treatment of a 1% carbon 45
Stainless steel in architecture 394
Stainless steels 123
Straightening hardened steel tools 166
Stress-relieving aluminium 101
Structure in wrought iron 275

T

Technical development in modern drop stamp and forging presses 415, 439
Television tube and valve manufacture 119
Temperature uniformity in heat treatment 63
Theory and practice of hammer foundations .. 283
Thin films and their use in metallurgy 91
Treatment of a 1% carbon spring steel 45
Tungsten 148
Twenty-five years of stainless steel 211

U

Ultra-high-strength steels, new 171, 297
Uranium-platinum alloys 386

V

Vacuum annealing, British bell-furnace plant .. 366

W

Welding in Russia 473, 502

BOOKS

British instruments 300
Copper data 300
Filler metals for joining 326
Harterei-Technische Mitteilungen 27
Hydraulic oils 326
Introduction to foundry technology 256

Iron and steel, volume two—steel production, the manufacture of 27
Materialprufung mit Rontgenstrahlen unter besonderer Berucksichtigung der Rontgenmetallkunde 70
Metal fatigue 70
Metallurgical thermochemistry 150
Modern foundry practice 256
Physical metallurgy of magnesium and its alloys .. 256
Physical metallurgy of rolling, the 150
Progress in metal physics, Vol. 7 256
Russian forging journal 356
Textbook of metallurgy 300
Zinc, the science and technology of the metals, its alloys and compounds 326

EXHIBITIONS

British instruments in Russia 81
Electronics and automation 258
Fuel efficiency and power 257
Gas at Harrogate 129
Mechanical handling 260
Production 258

FILMS

Die lubricant film 342
Industrial notebook on the generation and distribution of electricity 196
Lead the enduring metal 342
Liquefied petroleum gases in industry 196
Mechanical handling, advances in 342
' Stone into steel ' wins premier award at Venice .. 342

LEADERS

Automation, 1960 175
Britain's steelmaking 1
British markets 217
China—the leap forward 349
Competition 87
Drop forging today 479
Hazard 43
Metals of tomorrow 131
Noise in industry 263
Silver jubilee 393
Status of the metallurgist 305
Trade with Russia 437

NADFS

Annual banquet, 1960 438
Annual general meeting, 1960 163

NEW PLANT

Arc furnace for vacuum casting, 80-ton 78
Automatic forging machine, fully 390
Automatic high-vacuum heat-treating furnace .. 347
Bellows flowmeter, new 81
Beryllium monitor for industrial health 345
Bright annealing stainless steel 391
Bright platinum plating 216
Clean hardening small components 390
Cold-cathode-type discharge vacuum gauge .. 388
Constant-voltage source for Kent instruments .. 345
Decimal desk calculator 126
Drop-forging innovations 83
E.E.C. vacuum furnace for BISRA 78
Elcontrol developments 30
Electric arc furnaces, Britain's largest 77
Electron diffractograph 124
Finishing machine, new 210
Flow metering, improved 124
Gas-fired rotary furnace 520
High-strength concrete, new 84
Impact tester for metals 522
Induction heating, change-over switch for 42
Machinable cemented carbides 347
Mechanical surface-roughness comparator 388
15-MeV. mobile betatron 346
Microscope, industrial pocket 477
Milti-point potentiometer recorder 42
Packaged oil-gas plants 126
Plate-lifting clamps 83
Portable X-ray unit 388
Pressuretrol, new high-range 346
Process timers 522
Quenzine quench oil 216
Radiation protective screen 216
Radical development in balances 83
Rapid-response direct-reading portable thermometer 345
Scanning electron-probe X-ray microanalyser .. 216
Shot-blasting castings 77
Sieving metal powders 520
Sintering furnace, high-temperature 125
Soluble cutting oils 30
Spectrometer, mass 124
Storing enamel, new 37
Surface-grinding machine 125
Temperature control, high-precision 522
Tester measures cleanliness, new 81
Tin in outer space 77
Ultrasonic cleaning for degreasing plants 347
Vacuum fusion gas analysis of metals 126
Vapour-phase-process chromatograph 477
Vertical cylindrical closed-quench furnace 84
X-ray unit, new lightweight 477
